DETAILED ACTION

Allowable Subject Matter

1. Claims 1, 7-10, and 12-15 are allowed.
2. The following is an examiner's statement of reasons for allowance:

With regard to Independent Claims 1 and 10, the Applicant has sufficiently amended and narrowly defined a lighting device, wherein a polarization element is disposed between a light guide plate and a light source unit for transmitting linearly polarized light in a first polarized direction and reflecting linearly polarized light in a polarized direction normal to the first polarized direction, and further wherein a phase modulation element is disposed between the light source unit and the polarization element. The prior art fails to teach or suggest the combination of structural elements disclosed and claimed herein, and all subsequent dependent claims are allowed.

With regard to Independent Claims 7 and 13, the Applicant has adequately defined a lighting device, wherein a light guide of a light source unit includes a prism surface for emitting linearly polarized light from the light source unit without the use of a polarization separation element. The prior art fails to teach or suggest the combination of structural elements disclosed and claimed herein, and all subsequent dependent claims are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
